LEGACY EMR/EHR DATA ARCHIVE / MIGRATION SERVICES

A Seamless Solution

MICA Health is an industry leader in archiving and migrating electronic medical records and practice management information. Our vendor neutral archive solution, CDR (Clinical Data Repository), is simple, economical and easy to administer. Whether provisioned as a local appliance or hosted in our secure, compliant cloud, CDR provides a seamless solution that is easily accessible and user friendly.

TAILORED FOR YOU:

We understand there are many reasons that drive the need for a data archiving solution; joining a healthcare system or group practice, physician retirement, or simply replacing your current EHR or PM system. We work with each client to determine the most efficient and effective solution that fits their needs. Our options include:

- **Data Archiving services** that safely extract a static view of the medical record. Typically, we extract all scanned images, and render encounter notes, flow sheets, and other client specific documents from the source system. We also include a patient summary document that lists active medications, problems, allergies, and immunizations.
- **Data Migration services** that offer the advantage of incorporating legacy patient data into the new EHR system. A variety of methods can be employed to move either select data elements, or all data.
- **Data Archive Hybrid services** which offers the economical advantages of the Data Archive, with many of the advantages of the Data Migration option, by creating a Data Archive of your legacy data; as well as, export discrete data elements to be imported into your destination EMR including– demographics, medications, allergies, problem lists and immunizations.
- **Virtualization services** which offer the client the ability to “moth-ball” a legacy system, without the challenge of maintaining aging hardware. In many cases, we can virtualize an entire EMR/PM system on to a laptop or desktop machine for use on an as needed basis. We also offer secure cloud-based virtualization services for a wide variety of EMR and PM systems.

SOURCES WE HAVE WORKED WITH:

ADP advancedmd	IDX Groupcast PM
AllMeds EHR and PM	Logician EMR
AllegianceMD	McKesson Practice Partner
Allscripts / Misys MyWay EMR	MD Logic
Allscripts Professional EMR	MD Tablet
Allscripts Enterprise / Touchworks EHR	MEDENT EMR
Allscripts Practice Management	Medical Manager PM (various versions)
Amazing Charts	Medinformatix
athenaClinicals	MediNotes
athenaCollector	Medios
Cerner PowerChart Ambulatory	Meditab IMS EMR/PM
Chartlogic	MiSYS EMR
Clicktate	Misys Tiger PM
Cottage Med	NextGen eMR and ePM
DigiChart	Paperport
e-MDs	Practice Partner (not McKesson)
eClinicalWorks	QRS Healthcare Solutions
EpicCare Ambulatory EMR	Paradigm EMR and PM
FlexMedical	Smart Clinic by VIP Medicine
GE Centricity EMR	Soapware
GE Centricity Group Management	SpringChart
Greenway Prime Suite	Intergy (Sage, Vitera and Greenway)

CLINICAL DATA REPOSITORY FEATURES:

- Single point of access for multiple legacy systems
- Easily searchable by legacy patient identifiers (*name, social security number, date of birth*)
- Printing / PDF export of patient chart data
- HIPAA and HITECH compliant
- Easy implementation
- Custom configuration of modules

BENEFITS TO DATA ARCHIVE:

- **Cost efficient** - CDR allows practices to maintain the full legal patient record required by state law at a fraction of the cost of maintaining your legacy systems.
- **Legally compliant** - comply with state and federal regulations that safeguard PHI
- **Easy to use** - user friendly with little training necessary
- **Ensures Data Integrity** - imports almost all data types with full integrity (*legacy, clinical data, etc.*)
- **Eliminates costs** - to support your current legacy EMR and risks of aging software, operating systems and hardware.
- **Provides Data Accessibility** - search and report information at the click of a mouse, offering embed links to historical patient data from within your new PM or EHR system.
